

KEY CONTACT LIST:

**ATLAS PLUMBING**

Atlas supplied and installed all of the plumbing fixtures in the home EXCEPT the Owner's Bathroom Shower Fixtures. Those were supplied direct from Ferguson/Build but they were installed by Atlas Plumbing. Anything water related inside the home is Atlas Plumbing except for your Appliance Connections, which are by ABW.

PHONE: 703-330-0755

**FALCON HEATING & COOLING**

Falcon supplied and installed both the Condensers (Outside) and Furnaces (Inside). They also supplied and installed the thermostats, duct work, return air grilles and filters. I have provided you with brand new upgraded filters. They were changed on 10/16/2020 and should be changed again after 30-40 days. Your filters:

12x12x1 (3 of them in the secondary bedrooms)

16x16x1 (2 of them in the Owner's Bedroom and 2<sup>nd</sup> floor hallway)

Media Filter (1 in basement zone 1)\_\_\_\_\_.

I recommend buying 1 additional media filter for Zone 1. That way you can swap between a clean one and the used one. Don't forget to clean out your steam humidifier filter at least once a year or you'll get calcium build up in there.

Please send yourself Google Reminders or Program your EcoBee Thermostats to remind you to change all filters.

They also offer a paid service plan that I usually recommend starting at the end of Year 1 to help extend the life of your systems.

**RH ELECTRIC**

RH Electric supplied and installed all of the electrical wiring, recessed lighting, and devices and (installed) light fixtures. All of the light fixtures were purchased directly from Erin Schwartz at Dominion Lighting, she can be reached at [erin@dominionelectric.com](mailto:erin@dominionelectric.com). I have purchased both incandescent and LED bulbs for your home. If you use incandescent bulbs you must follow the recommended Wattage. If you use LED I recommend a 60W or 100W equivalent bulb.
